OBJECTIVE

- To deliver revolutionary solutions showcasing my expertise, skills, knowledge and passion in the world of software development.

EDUCATION

Durham College

September 2012 – April 2017

Oshawa, Ontario

- Computer Programming Analyst Advanced Diploma Program
- Graduated with honors

WORK EXPERIENCE

Runkeeper (ASICS Digital) (Senior API Engineer)

December 2021 – Present

Remote

- Delivering a constant flow of backend solutions that provide API data to our mobile clients
- Leading modernization efforts, always looking for the most efficient way to go about solving problems and delivering features
- Advising and reviewing strategic plans to roll out features to our app while helping design and discuss the systems to do so
- Database design (Postgres, MySQL and DynamoDB), migration plans from legacy systems, data management, query optimizations, system development and planning
- Mainly coding in Java using Functional solutions and problem solving
- Developed a Full-stack Internal CMS using Typescript & NextJS with custom-built auth
- Exploring and integrating AI solutions like Amazon Bedrock
- Using & learning multiple different AWS services like Eventbridge, SNS, SQS, DynamoDB, ElastiCache, RDS, ECS, S3, Amazon Bedrock, Cloudwatch, etc

Scotiabank Full Stack Developer (Senior Programmer Analyst)

April 2017 – December 2021

Scarborough, Ontario

- Developing Spring API Restful and SOAP Services in both Java and Kotlin
- Developed multiple business solutions through the use of node.js to help tackle labor intensive tasks in an efficient manner
- Worked with Google Cloud using Pubsub, Cloud Functions and Spanner
- Developed front end screens that connect and interact with the mainframe and host programs to provide fast and effective ways of completing specific tasks using Rest and SOAP calls. These screens included the use of Java, HTML, JSP and Javascript / JQuery
- Worked on multiple CICS and JCL tasks as well as managed multiple DB2 tables

Game Developer (Hobby)

March 2017 – Present

Shade Strider (Jan 2024 - Present):

- Using Godot 2D and C# to develop a Side-scrolling Runner / Platformer game
- Working with a Pixel artist as a 2-person passion project
- Producing all the music myself
- Started as a Game Jam Entry (Pirate Software Game Jam 14)
- Website: <https://www.shadestridergame.com/>

Valerian X (March 2017 - Jan 2020):

- Using Unity 2D and C# to develop a Roguelike battle arena mobile game
- Commissioned and managed multiple artists to create 2D art and animations for my game
- Producing all the music myself
- Have a playable Demo that I've shown off at a few Game Dev events (TwitchCon Dev day, etc.)
- Originally started as a College project and turned into a passion project

Freelance Programmer

March 2010 – August 2010

- Independently programmed an online multiplayer game server in Java that had over 500 unique accounts registered

SKILLS, ACCOMPLISHMENTS & INTERESTS

Skills:

- Proficient in Agile Development Methodologies
- Proficient in the following programming languages: Java, C#, Javascript / Typescript, HTML, SQL
- Proficient in the following technologies: Spring, React, NextJS, Godot, Unity, NodeJS, .NET, Postgres, MySQL, various AWS services
- Experience in using Mainframe technology such as COBOL, JCL, DB2, etc
- Experience in working with Microsoft Word, Microsoft PowerPoint, Microsoft Visio and multiple different spreadsheet programs
- Understand Mobile / Game Development concepts, technologies and market
- Knowledgeable in modern computer technology
- Work well with people / customers
- Experienced at working in group environments
- Willingness to learn new things

Accomplishments:

- Developed and soon releasing a PC game on Steam using Godot with C#
- Developed a mobile game for Android in C#
